

Eng. Williams J.N Namale

Education; M.Sc (Electrical Engineering), St.Petersburg, USSR.

Contact; wnnshisia@yahoo.com

Area of specialization: Electronic Communications and Broadcasting.

Research Interests: Wireless communication, optical communication, Acoustics and semiconductor devices. Solar energy source potential in rural Kenya. A case study to enhance and harness energy for power generation. A case study in sourcing on the feasibility of development of silicon, glass and fiber optic manufacturing in Kenya.

Publications;

1. Utilization of semi-conductor devices in modern fabrication for satellites with 2700 channel capacity.
2. Back-bone m -wave systems.
3. Waves and vibrations.
4. Electro-thermodynamics for University students.
